## Spring 2020 | COVID-19 Reflection

**Name:** Monica Trifas

**Faculty Rank:** Associate Professor

**Department:** Mathematical, Computing and Information Sciences

**School:** Science

In the Faculty Development Sessions, we discussed effective modalities to integrate our lectures in CANVAS. We shared our experiences with KALTURA to create videos. We also explored a range of apps to be used to create stats, to evaluate students' participation, and stimulate their interest as well.

Usually I upload the content of the modules in CANVAS, in the first week of the semester. I keep in touch with the students using the discussion board , and we also use the Inbox in CANVAS. Each class meeting, I write a lengthy summary of the lecture, so , for those who could not attend, it will be clear what we covered.

I suggest, offering periodical updates on video recording, KALTURA (CANVAS allows embedding KALTURA videos) may help. For example, my colleague, Dr. Robert Elliott, just explained to me today ( and showed, in a Teams call), a series of lectures he created using KALTURA. I assume adding voice to the slides will make the presentation more appealing.
