CLARENCE WILLIAM DAUGETTE

President, and Teacher Psychology and Education. (B. Sc. '93, M. Sc. '94, Alabama Polytechnic Institute, LL. D., University of Ala., 1916; Science in State Normal School '94-'99; Summer work at the University of Chicago '01 and '02; President State Normal School '99—.)

MARY C. FORNEY,

Pedagogics. (Graduate State Normal School '94; Teacher in Public Schools '94-'96; Summer work at Monteagle '98; at University of Chicago '01 and '02; Columbia '05; Peadagogy in State Normal School '97—.)

FLORENCE O. WEATHERLY,

Penmanship, Shorthand and Typewriting. (Graduate Birmingham High School '89; graduate Birmingham Normal Training School '90; Teacher Birmingham Public Schools '91-'92; Teacher in Public Schools of Alabama '95-'00; Stenographer '00-'06; Secretary to President and Teacher of Stenography and Typewriting, State Normal School '06—.)

F. H. BOSTIAN,

History and Economics. (A. B. Roanoke College '06; A. M. Princeton University '07; Principal High Schools in Mississippi and Virginia '07-'09; Superintendent City Schools Albermarle, North Carolina '09-'10; Instructor University of Alabama Summer Terms '14 and '15; Professor History and Economics State Normal School '10—.)

SUSAN LANCASTER,

Librarian and Instructor in Library Science. (Graduate Carnegie Library Training School, Atlanta, Ga., '07; Librarian State Normal School, March '08—.)

94800

BENJAMIN EDWARD HARRIS,

Assistant in Manual Training, Mathematics and Director of Athletics. (B. S. '09; M. E. '10 Alabama Polytechnic Institute; Assistant in Mathematics and English, Alabama Polytechnic Institute '09-'10; Mathematics and Athletic Director Seventh District Agricultural School (Ala.) '10-'11; Assistant in English and Mathematics and Director Athletics State Normal School '11—.)

CLAUD HOWARD

English. (A. B. East Texas Normal; Assistant same '07; Superintendent Gober, Texas, '08; A. M. University of North Carolina '09; Instructor in English, University of North Carolina '09-'10; A. M. Harvard University '11; Teacher of English, State Normal School '11—.)

CHARLES W. SAUNDERS,

Science. (B. S. University of Missouri '07; Summer work University of Missouri '07; University of Chicago '08, '09, '11; M. S. University of Chicago '11; Public school work six years; Principal High School, Aurora, Missouri, '05-'06; Science Teacher Shreveport High School '07-'11; Science, State Normal School '11—.)

ALBERT LEON YOUNG

Manual Training and Agriculture. (B. S. '10 Alabama Polytechnic Institute; Public Schools '05-'07; Instructor in Science, Manual Training and Agriculture, Bibb County High School '12-'13; Summer work at the University of Chicago '13, Teacher Manual Training and Agriculture, State Normal School, '13—.)

MARTHA L. HYDE,

Public School Music and Drawing. (Student University of Arkansas; National School of Music, Chicago; Teacher of School Music in Public Schools, Joplin, Missouri; Pueblo, Colorado; Teacher School Music Jacksonville State Normal '13—.)

SARAH P. MARKS

Domestic Science and Art. (Academic Training Rose Hill Seminary, Versailles, Kentucky; College Training Kentucky State University; Instructor Domestic Science State Reform School, Greendale, Kentucky, '10-'11; Student Assistant Domestic Science Department Kentucky University '10-'11; Assistant Matron and Director Women's Dormitory State University '11-12; Instructor Domestic Science of Episcopal Mountain Mission, Proctor, Kentucky, summer '12; Students' Home Economics University of Kentucky, '12-'13; Instructor Domestic Science and Household Arts St. Johns' Home Training School, Corbin, Kentucky; Teacher Domestic Science and Art, State Normal School '14—.)

MRS. ILAH WILLIAMS POLHILL,

Extension Worker State Normal School. Calhoun County Agent Girls' Canning Club and Home Demonstration Work. (Academic Training, Belmont College, Nashville; Home Economics State Normal School, Athens, Georgia; Extension Work State Normal School '15—.)

EDITH JOHNSTON,

Critic and Methods. (Graduate Anniston Training Class for Teachers '04; Teacher Anniston Public Schools '04-'11; Student Summer School at Knoxville '06; Diploma in Supervision, Teachers' College, Columbia University '12; Training School State Normal School '12—.)

ANNIE AGEE

Matron Girls' Dormitory.

MRS. M. R. TEAGUE,

Supervisor Foods and Cookery

FLORENCE WEATHERLY,

Secretary to the President and to the Faculty.

GEO. CHAMPION,

Custodian of building and head janitor.

Announcement for 1916-1917

PURPOSE.

The school was established by the State of Alabama to prepare teachers for its public schools.

WORK

From the Course of Study to be found elsewhere it will be seen that the Class A Normal Schools of Alabama offer four years of professional work. Emphasis is placed upon the preparation of teachers for the rural schools and many subjects concerned, with this distinctive phase of education only, are found in the program. Rural needs, conditions, methods are studied.

Preparation for grade work is provided in courses in methods for all the grades, given by experts who have charge of the Critic Work in the grades of the Training School.

Music, Drawing, Industrial Work, Household Economy and Physical Training receive the attention which their importance demands. They are an essential part of the regular required course.

TERMS OF ADMISSION

Students are admitted into the school and are assigned to classes upon presenting to the President of the Faculty tickets of admission, signed by the Treasurer of the State Normal School. No one will be recognized as a student of the Normal School, nor allowed to attend classes until his ticket is presented.

Applicants for the Normal Course must be at least fifteen years of age, of good moral character and sound

constitution, and must stand such examination as the Faculty of the School may require. Those students who apply for Normal privileges are required to sign the following agreement to teach in the public schools of this State:

"We, the undersigned, being about to matriculate for the course of instruction furnished by the Jacksonville Normal School for Teachers, do hereby, each for himself, severally agree that either before or within five years after our graduation from this institution we, each of us, will teach in the public schools of Alabama for an aggregate period of eighteen months; failing therein, we agree to pay to the said Jacksonville Normal School the tuition fees as fixed by the Board of Trustees which have been remitted us by reason of the execution of this obligation."

ACADEMIC REQUIREMENTS.

To enter upon the work of the standard normal diploma course one must have completed ordinary eighth grade or first year high school. Beginning with the session of 1917-18 two years of high school will be required for entrance.

EXAMINATIONS.

Entrance Examinations will be held on the first days of the school session, and at such other times as may be most convenient for the students who enter during the course. Very few examinations after entrance are given merely as tests of scholarship, though the rules of the Board with reference to examinations are followed by all the teachers. Many questions are given to make the student-teacher familiar with the form of examinations, and to direct his attention to the more important parts of the subject. Written recitations and reviews are a constant part of the program.

ATTENDANCE

No student can do himself justice by an irregular attendance upon his school duties; besides his own loss, he damages the proper course of the whole class. It is expected, therefore, that every student will allow nothing to interfere with his regular attendance. Normal students will be dropped from the list for non-attendance except when the cause is unavoidable.

TUITION.

The fees are paid to the Treasurer of the School, and must be paid in advance for the full term of three months. No deduction is made for absence, other than protracted sickness of two weeks or more. This deduction is allowed upon the next term.

INCIDENTAL FEES.

All students, per session.....	\$15.00
Library, per year (payable upon entrance).....	1.00
Summer School, twelve weeks.....	12.00

LOCATION.

Jacksonville is one of the oldest towns in Northeast Alabama. It is on the Southern Railway and the Seaboard Air Line.

Anniston is twelve miles south, Rome fifty miles northeast, Birmingham sixty miles west, and Atlanta about the same distance east of this place. The surrounding country is beautiful, as at this point the great Blue Ridge Mountains begin to break into rolling hills and sheltered valleys. On the east side of the town, at a distance of two miles or more, the hills rise almost to the dignity of mountains—one peak,

Chimney, being something over seventeen hundred feet above the level of the sea. The School is situated upon a hill and has an elevation of seven hundred and fifty feet above the sea. At the foot of this hill the town spring bursts forth with a flow of over a million gallons per day, one of the largest and purest limestone springs in the State. The town is noted for its healthfulness. Our students invariably improve in health while here.

The soil is a deep red clay, with here and there a strip of sandy loam, especially upon the creek bottoms. The country is well watered and drained. No malaria or other swamp diseases are known. The town of Jacksonville is noted throughout the State for the culture and refinement of its citizens. Five of the Christian denominations are represented here, and services are held every Sunday in several of the churches.

The tone of morality is high, and very few, if any, of the temptations of the cities are offered to the students. All the citizens of the town unite in endeavoring to make the stay of the young men and women pleasant and profitable.

GENERAL DIRECTIONS.

A 'bus meets all trains passing Jacksonville. Students, upon arriving, should ask for the President's office or residence. All ladies will be met at the depot by a representative of the school if information is given as to the time of arrival. Full accommodations are provided for both men and women, but rooms should be engaged as early as possible.

LECTURES.

Public lectures are delivered during the session in the hall at the School free to all the students, or at reduced rates, and at a small price to the public. The lectures are upon subjects of interest to the pupils and to all earnest, thought-

ful men and women who have the good of the State and its educational interests at heart. The State Superintendent of Public Instruction and his assistants usually pay one or more visits to the school annually.

DISCIPLINE.

It is the aim of the faculty to make the school work as pleasant as possible. But all students who attend are expected to come with the desire to learn.

We want honest, steady, Christian men and women who are desirous of benefiting themselves and their State, and who are willing to endure that they may succeed.

Ninety per cent of our students are teachers of mature age, who hold State certificates and have seen service in teaching. This is essentially a school for teachers.

The discipline of the school is firm, but not too exacting. A cheerful obedience to all the rules of the School is enforced, but such moderation is exercised by the teachers that the pupils willingly obey whom they respect and esteem. The following are the rules adopted by the Board for the conduct of pupils in the Normal Schools of Alabama:

Rule 9. "Every pupil in the Normal Schools of Alabama, in addition to complying with the requirements fixed by this Board for entrance into said school will be required to render strict obedience to all the rules and regulations for the government of the schools, and for the conduct of the pupils thereof. The pupils shall conduct themselves in a manner becoming future teachers in the public schools in Alabama, and will be expected to show a spirit of loyalty to the institution they attend, and give willing and ready obedience to the president and faculty in charge of the schools. Acts of insubordination, and defiance of authority, and conduct prejudicial to discipline and the welfare of the school will constitute grounds for suspension or expulsion from school.

"Pupils denied admittance to one normal school for cause, shall not be admitted to another normal school."

Rule 10. "Pupils may be expelled from any of the normal schools."

a. "For wilful disobedience of the rules and regulations established for the conduct of the schools."

b. "For wilful and continued neglect of studies, and continued failure to maintain the standard of efficiency required by the rules and regulations."

c. "For conduct prejudicial to the school and for conduct unbecoming a student or future teacher in the schools of Alabama, for insubordination and insurrection, or for inciting other pupils to like conduct."

d. "For any conduct involving moral turpitude."

REPORTS AND PRIZES.

Reports are given monthly. When a student fails to do his duty, as through neglect of studies or disorderly conduct, it is deemed a sufficient indication that he will not make a successful teacher, and he is asked to withdraw from the school. Parents should insist on their sons and daughters sending their reports promptly and regularly and should sign them and return to the President.

No prizes or medals are given for special excellence in any of the grades of the School. The interest is maintained throughout the whole class, and a more just conception of the objects of study is acquired by keeping from the student all selfish emulation.

SOCIETIES.

The Training Class devotes one hour each Saturday to general literary work, the basis of which is recitations, readings and debates, and such other subjects are introduced as prove of interest and profit to the students. In the Normal

School three societies are maintained, the "Calhoun" and "Morgan" for men, and the "Sidney Lanier" for women. These societies are all under the direction of the Normal Faculty but are officered and controlled by the students. Their work is mainly of a debating character but other subjects for thought and expression are presented from time to time.

CHRISTIAN ASSOCIATIONS.

Both organizations, the Y. M. C. A. and the Y. W. C. A. are in active operation in the School. Much good is accomplished through their wholesome influence upon the students.

They aid in physical culture and athletics and stand for purity in sport. They have for their purpose the strengthening of the Christian characters of all the students of the institution. They endeavor to take the place of the Christian influence of the home while the men and women are in school.

The work of these associations is heartily endorsed and encouraged by the Faculty.

They maintain committees to meet the trains and assist new students in getting started in school. Members of these committees may be recognized by the badges worn.

Devotional exercises are held every Sunday afternoon, led by the students, but often addresses on inspiring subjects are given by members of the faculty and others invited to deliver them. Bible missionary classes are held each week to study the great Book in a systematic way.

LIBRARY

There are over 2000 well selected books, including dictionaries and reference works, books on education, biography, history, travel and literature in the library. In addition, there are many public documents. The books are

classified according to the Dewey Decimal System and the dictionary Card-catalogue is used, which makes all books available. It is kept open all day, and a trained librarian is in charge. A course in Library Methods is given to the Seniors, the purpose of which is to give such instruction as is needed in the formation and care of a library. The course includes such subjects as the selection of books for the different grades, buying books, simple methods of accessioning, classifying, cataloging and organizing, also methods of raising money for the establishment of school libraries.

A reading table is supplied with magazines and newspapers as follows:

American Magazine,	Nature Study Review,
Boston Cooking School Journal,	National Geographical Magazine,
Century	Primary Education,
Commoner,	Public Libraries,
Cosmopolitan,	Puck—Weekly,
Current Literature,	Review of Reviews,
Delineator,	Saturday Evening Post,

Forum,	Woman's Home Companion,
Good Housekeeping,	World's Almanac,
Good Health,	World's Work
Harper's Monthly,	Uncle Remus,
Health Culture,	Ladies' Home Journal
Journal of Geography,	Anniston Daily Star & Hot Blast,
Kindergarten Review,	Birmingham Age-Herald,
Literary Digest,	Birmingham News,
McClure's,	And others.

STUDENTS' AID, ATKINS FARM.

Through the generosity and philanthropy of Mrs. Fannie Atkins of Jacksonville, and her desire to perpetuate

the name of her husband, we are able to offer rooms without cost to a limited number of young men. Mrs. Atkins donated a farm for this purpose about two miles out on the Anniston pike. The house has ten rooms. Those who desire to secure reservations in this building will please communicate with the president as soon as possible. It is for the benefit of those who need the assistance. Work can be secured for a limited number. All who wish to attend this school and who need help should write at once.

BOARD.

DORMITORY FOR GIRLS.

The rates for the new dormitory, which has accommodation for 140 girls, are \$14.00 per month, everything furnished, except the room linen. Short term rates are, for less than one month, \$5.00 per week, less than a week, \$1.00 per day. Board is payable by the term, in advance. Most rooms have two single beds, only two pupils to the room. The dormitory has electric lights, hot and cold water, tub and shower baths. It includes hospital rooms for the care of the sick, and is steam heated throughout.

Each student must furnish for herself the following: towels, 1 white spread, 2 pillow cases, 2 pairs of sheets, 1 pair of blankets, 1 comfort, 2 clothes bags and sanitary paper napkins, all of which must be marked with her name, except the napkins. Each student should bring sheets and towels and such toilet articles as she might need during the first 24 hours in a suit case to guard against delay of trunks.

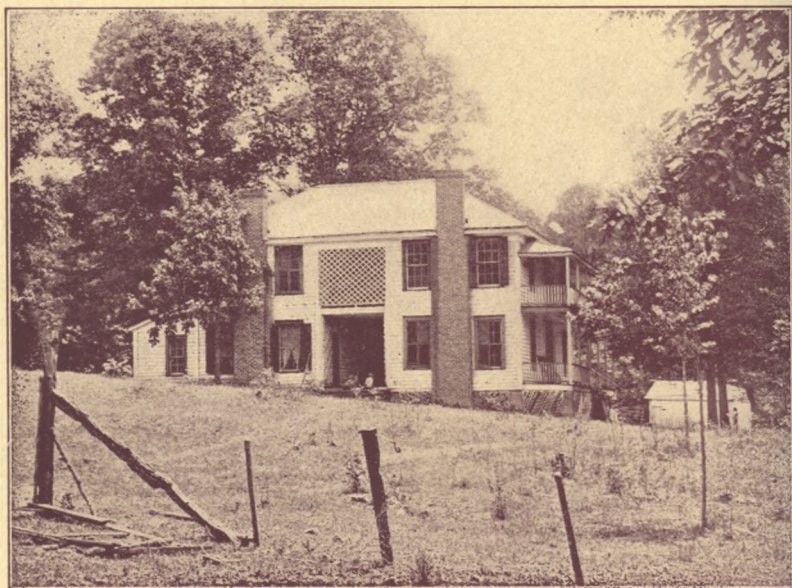

A cut of the dormitory is given elsewhere in this catalog, and assignment of rooms will be made from the date of reservation. Those who would like rooms should reserve them as early as possible. In case of necessary withdrawal from school, unused portions of money paid for board will be refunded.

ATKINS HALL

SOME WORK DONE BY STUDENTS

HOUSE ON SCHOOL FARM

DORMITORY FOR MEN.

Arrangements have been perfected by which we have procured the Allegheny Hotel to be used in connection with Atkins Hall as a dormitory for men. These two buildings will furnish accommodations for about one hundred men—two per room. The rates for board will be \$12.50 per month, meals furnished at the Girl's Dormitory. Some students rent rooms out in town and do their own light housekeeping, thereby greatly reducing the cost of living here. Rooms may be had for \$2 per month up, according to furnishings and location. A list of persons who have rooms for rent will be given upon application.

GENERAL REQUIREMENTS

All girls except those who do light housekeeping or who have very near relatives residing in town are required to board in the dormitory so long as there is room.

SCHOOL PUBLICATIONS.

Two magazines are published under the auspices of the School, one, the Normal Bulletin, edited by the faculty and devoted to the interests of teachers; the other, Purple and White, edited by the students, whose aim largely is to depict the school life of the pupils. Our local paper the Jacksonville Record, devotes some space weekly to Normal School news.

CLASS MEMORIALS.

It has been the custom of the classes of the Normal School to make some gift to the school as a memorial.

The following is the record since 1905:

Class of 1905—Set of lace curtains for Chapel.

Class of 1906—Three patent gasoline lamps.

Class of 1907—A stage chair for the President.

Class of 1909—A \$30 set of books for library, and \$10 set of shades and curtains.

Class of 1910—A table for reception room.

Class of 1913—Statues of David, height on pedestal 6 feet.

Class of 1914—Set of books and library.

Class of 1915—Statues Victory and Minerva.

PROFESSIONAL COURSE FOR GRADUATES OF ACCREDITED
FOUR-YEAR HIGH SCHOOL

	PROFESSIONAL	ACADEMIC	INDUSTRIAL
First Year	The training of children. School Management. Rural Sociology and Methods. State Manual. Observation.	English and two other Academics to be selected by the President.	For Girls: Cooking and sewing and music or drawing. For Men: Manual training and or drawing.
Second Year	Educational Psychology and Methods. History of Education. The American Rural School. Practice Teaching.	English and one other Academic to be selected by the President.	For Girls: Cooking and music. For Men: Manual training.

NOTE:—Substitutions are required for any profession in this course already finished.

Graduates of accredited three-year High School classification.

EXPLANATION OF COURSES OF

1. *Uniformity Among Schools.*—The requirements for entrance, and for graduation are the same for all Normal Schools of the State.

2. *Electives.*—In Arts two subjects must be chosen during his entire school course. For girls, music or drawing; for boys, manual training.

3. *Credits.*—The term "Credits" means the number of months in any one subject or course of study, being at least forty-five months in any one subject or course of study required, and in counting the credits in the Department of Arts is estimated at 150.

4. *Status of Forfeiture.*—The term "Forfeiture" means the loss of all work completed for all work completed for readjusting.

the said work was done. A former pupil, therefore, who has completed the work of any class would be admitted to the next higher class in the present course.

5. (a). The whole number of recitations shall not exceed 26 per week.
- (b). Twenty of these are designated as majors—six as minors. Mathematics, history, science, English and pedagogy constitute the majors. Drawing, music, manual training, and household arts comprise the minors.
- (d). Each of the majors recites four periods per week—the minors two periods per week.
- (e). In the preparation for each major an average of an hour and a quarter of study should be taken; for the minors not over thirty minutes, some requiring no outside preparation.

ENTRANCE REQUIREMENTS

Class A.—The equivalent of one year of high school (four high school units) is required for entrance to the Class A schools, the said entrance requirement to be satisfied by certification or by examination, as the President may determine. For the session 1917,-18 two years of high school will be required.

Certificates.—Holders of second grade State certificates may enter the Freshman Class conditioned upon passing satisfactory examinations in elementary algebra and English grammar. Holders of such certificates have twenty term credits, which classifies them as second year students. The credit is apt to be distributed among the Freshman and Sophomore classes.

Graduates.—Graduates from accredited four year colleges may enter the two year preparatory course without examination.

Applicants for admission without examination.—Applicants for admission without examination must be recommended by passing satisfactory examinations in entrance.

Complete examinations.—Those desiring to take the complete examinations may do so at any time and the President may determine. Those desiring complete examinations may be admitted to the examinations if they are at least

to graduate

SUMMER SCHOOL

A summer school of twelve full weeks has been organized as a permanent feature of the Normal School. Our plan is to divide the calendar year into four quarters of twelve weeks each, two weeks vacation in the summer and two weeks during Christmas holidays. This keeps the Normal School open for students the entire year which should prove of especial convenience to teachers already in service who can spend their vacations in credit work toward a diploma.

The first full summer quarter of twelve weeks is now in session with an enrollment of nearly 250 teachers.

Jacksonville with its elevation of 750 feet and its mountain climate is ideal for summer study. Up to this writing, June 22, there has not been a night this summer that the people of Jacksonville have not found it comfortable to sleep under at least one blanket.

The courses offered during the summer quarter are as follows:

1. Regular work toward diploma.
2. Extension work for third, second and first grade state certificates.
3. Review work for the regular state examination.

NORMAL DIPLOMA A FIRST GRADE CERTIFICATE.

The Legislature recognized the work of the Class A

Normal Schools by providing that those who hold diplomas shall be awarded first grade certificates without further examination upon recommendation of the Presidents of the schools.

EXTENSION OF CERTIFICATES.

Courses for the extension of certificates will be offered throughout the regular session. Any student who attends for a period of six weeks and pursues a course of study consisting of a minimum of two professional subjects and one other, or a maximum of four professional subjects or two professionals and two others may have any grade of state certificate extended for a period of one year, provided the extension course is taken within the last year of the life of the certificate.

DEPARTMENTS OF INSTRUCTION

Training School Department

The training class are taught all subjects included in the public school course, and, in addition, regular lessons in cooking, sewing, singing, drawing, manual training, and physical culture are given all the students. The regular State course for the seven grades is followed.

Department of Science

MR. SAUNDERS
PRES. DAUGETTE

MR. HARRIS
MR. YOUNG

Both class demonstration and individual laboratory work are provided for. Every effort is being made to teach all the sciences by objects, experiments, demonstrations, and observations. The apparatus, chemicals and museum specimens already on hand are of considerable value. While a thorough knowledge of the subject matter of each text is required, a mental picture of the thing itself rather than of the words describing it is sought. Each subject is taught as a branch of the science of life rather than as a distinct science within itself.

AGRICULTURE

No teacher's education can be considered complete unless he has a knowledge of agriculture. Especially is this true of those who expect to teach in small town and country schools of Alabama. Between eighty and ninety per cent of our people make their living through Agriculture. Great emphasis will be placed upon this subject in this school, its importance being considered second to none other. The following course is offered:

Sophomore Class.—Southern farm crops with demonstrations, seed selection, testing and judging, study of injurious insects, with methods of destruction. Boy's and girls' club work is emphasized. School gardening and horticulture, pruning, grafting and spraying, poultry raising, dairying and animal husbandry.

GEOGRAPHY

Physical, Commercial and Industrial Geography, with special methods in elementary geography, will be offered for two terms. This is taught by the topical method. Special attention is given to Physical Geography and its influence upon the industries and institutions of man. The dependence of production upon the physical conditions of soil and atmosphere are fully stressed, emphasizing the industrial side of Geography. Little pure memory is exercised, but the correlation of nature study, physical conditions, industrial development, commerce and history are fully shown. Methods once per week in public school Geography given.

BOTANY, ZOOLOGY AND NATURE STUDY

Botany and Zoology, applied to rural life, are given serious study through the fall and winter terms by text demonstration, discussion and laboratory methods. The commoner plants and animals found in the rural districts of Alabama are largely made the basis of study. These subjects are closely correlated with Agriculture. Plants and animals, useful and harmful to the farmer, are given attention. Excursions are made to the fields, preserved specimens of plants and animals are shown, individual experiments in the propagation, fertilization and spraying of plants made. Each student learns to use the compound microscope. A deposit of one dollar to cover breakage and loss will be required.

In Nature Study the same line of work is pursued, except on a more elementary basis, and the endeavor is made to have Nature Study merge itself into Botany, Zoology and the other sciences.

CHEMISTRY

General Chemistry, with special emphasis on farm and household chemistry, is offered for three terms in the Senior class. This subject is necessary for those teachers who wish to demonstrate such subjects as Physiology, Agriculture, Domestic Science and Physics. Here the life processes of digestion, assimilation, respiration, oxidation and reduction in the cycles of nitrogen and carbon are taken up and pointed out as never before in Physiology and Biology.

All the preceding sciences are reinforced and new fields are opened. The fundamental principles of Chemistry are taught, but the emphasis is placed upon the applied and practical side of the science, with a minimum amount of attention to that part which prepares for more advanced work in pure science. There will be recitations with demonstrations three times per

week, double laboratory periods two times per week, a laboratory fee of one dollar and fifty cents per term for materials and deposit for breakage.

PHYSICS

Physics, with special application to farm life, is required three terms of the Junior class. Transformations of energy and advantageous application of energy resources around us, with the aim of the removing as much as possible of the isolation and drudgery of farm life, will be dwelt upon. A laboratory fee of fifty cents per term is required. Recitation periods with demonstrations three times per week, laboratory, two double periods per week.

ADVANCED PHYSIOLOGY AND HYGIENE

An advanced course in this subject is given for one term. The principal emphasis will be placed upon health and hygiene for the individual and public with special application to country conditions and methods of teaching.

Department of English

MR. HOWARD.

The primary aim of the work in the English department is the preparation of teachers for efficient instruction in public school English. The successful teacher of English must be, first a master of it, and, second, a master of the methods of presenting it to others. Consequently, the two aims of English study,—intelligent appreciation of the best English, and effective expression, both oral and written,—are viewed from the pedagogical standpoint and the best methods of presentation are suggested throughout the courses.

To accomplish the aim of appreciation, classics best suited to the advancement of the pupils and most needed in their teaching are carefully studied. Emphasis is placed upon the *personal* appreciation of each production. Constant practice in oral and written composition is designed to give free and effective use of practical English most needed by teachers.

FRESHMAN

English I.—Literature and Composition with methods in Language and Grammar.

1. Literature.—Selected classics carefully and appreciatively studied.
2. Composition.—Oral and written. A close study of the elements of composition. Special attention given to letter writing. Themes written on classics studied and on subjects of vital interest in rural life.
3. Methods in Language and Grammar.—This work is designed to teach the students the best methods of teaching these subjects in the rural schools.

SOPHOMORE

English II.—Literature and Composition with methods.

1. Literature.—Selected classics studied in class. Some are read outside and reported on. Attention is given fiction so that teachers in rural communities may guide intelligently the general reading of their pupils.
2. Composition.—With text as a reference book, frequent themes are written for practice in the most common forms of discourse.
3. Methods.—The best methods of teaching Literature and Composition are presented and discussed.

JUNIOR

1. Literature.—A full survey of the field of American Literature. Emphasis is placed upon the intensive and appreciative study of representative selections from the best writers, especially those dealing with rural life. History is secondary and is used to make clear the temperaments of the writers and the periods and to show the essential dependance of literature upon social, religious, and economic conditions.
2. Composition.—Critical and appreciative themes are written on selections and writers studied, and practice is given in writing the simple types of literature, such as the short story, essay, etc.

English III.—American Literature and Composition.

SENIOR

English IV.—English Literature and Composition with special study of English adapted to the elementary and rural schools. The general plan of study is the same as that of English III.

Department of Mathematics

MISS FORNEY

MR. HARRIS

In all courses in Mathematics methods will be discussed, plans will be formed for Mathematics in the Primary and Grammar grades, and a short history of the growth and development of the various branches will be included. Clearness of statement in both oral and written work is insisted upon. Mathematical conceptions are made clear by the use of apparatus which the department possesses and by that which the student makes as his needs arise.

The following courses are given in this department.

ARITHMETIC

Arithmetic.—Arithmetic, as applied to rural life, will be given two terms. This presupposes a completion of complete arithmetic, and deals with the problems arising on the farm which involve arithmetic. The calculation of percentages in fertilizers, farm accounts and bookkeeping, methods of teaching the subject from the standpoint of practical country life.

ALGEBRA

Algebra.—Advanced Algebra is studied three terms, one in the Freshman class and two in the Sophomore. A review of underlying principles, followed by a complete study of quadratic equations, the binomial theorem, undetermined coefficients, the graph, roots and determinants, and the theory of equations.

GEOMETRY

Plane Geometry, with practical application, is given one term in the Sophomore year, and two in the Junior. Original exercises will be a prominent feature of the work. Methods of attacking theorems will be carefully studied. One of the chief aims is to cultivate a logical habit of thought.

Solid Geometry is given one term in the Junior class. It is followed by Trigonometry and Surveying, with special reference to landscaping, plotting and terracing.

Department of Psychology and Pedagogy

MISS FORNEY

PRES. DAUGETTE

THEORY AND PRACTICE

1. Freshman.—This introduces the young pupil to the responsibility that will rest upon him as a teacher and will give him an insight into the nobility of the teaching profession.

CLASS MANAGEMENT

2. Freshman.—In management the necessary qualifications of the teacher, the vital element of the school are studied. Then the school house, the heating, ventilation, lighting, seating and the value of artistic surroundings, arrangement of daily program, school diseases and disorders are considered.

Under school discipline the proper development of the will is shown to be through worthy incentives, natural punishment and thorough moral instruction given directly by precept and example and indirectly through biography and literature.

School management for rural and village schools is studied specially though a study is made of different types of school organizations, of the classification of pupils and supervision, etc., The inter-relation of school, family, society, church and State is shown.

3. RURAL SCHOOL PROBLEMS

Relation of Rural School to the community, its importance and its possibilities as a social center, and similar topics are discussed. The problems of organization, classification, and programs are studied.

4. ELEMENTARY PSYCHOLOGY

Sophomore.—Psychology is the foundation of all educational study. The different powers, activities and operations of the mind will be studied, the "Stages of Development," the "Culture Epoch" theories, the social character of experience and education.

5. RURAL SOCIOLOGY

Sophomore.—The object of this course is to enable the teacher to

GIRLS AT PHYSICAL CULTURE

CLASS IN WOOD WORK

enter into the life interests of the rural community, to understand the environment of his pupils so that the school work will be made to enlarge his appreciation of country life and the opportunities and possibilities of enriching it.

6. GENERAL METHOD

Junior.—Under general method will be studied the aim of education, the psychological principles underlying the recitations, drills, reviews, examinations; the steps of recitation that bring into play the different powers of the child; the relative value of the several branches for training sense perception, memory, imagination, attention, volition, etc. The value of different methods as story-telling, Socratic method, Herbartian method, etc.

7. EDUCATIONAL PSYCHOLOGY

Junior.—This course is intended to prepare the teacher for an intelligent, sympathetic understanding of the child. It will emphasize the steps of development, and the materials of instruction, the child's interest,—natural and acquired, the value of experience, adjustments and habits, the relation of physical, emotional, intellectual, social, moral and religious life of the child, and the application of the principles of psychology to educational practice.

8. SPECIAL METHOD

Senior.—This course will include a study of the forms of the recitation, their use and application to different subjects and topics. It will cover a study of the methods of teaching all the subjects included in the public school course of study.

9. ORGANIZATION OF RURAL COURSES OF STUDY, AND SUPERVISION OF COUNTRY SCHOOLS.

Senior.—The needs of the Rural School will be studied, the course of study will be examined in relation to these needs, the value of supervision, and the teachers' and the schools' duties and relations to the supervisor will be studied.

10. PRACTICE TEACHING.

Senior.—Practice teaching is required of all Seniors once per day during the entire session. A part of the work is done in the graded training school,

and a part in the country schools at Merrilton and Cedar Springs. The object is to familiarize the teacher with actual conditions, and to show how these may be improved. Extension work in which the seniors take a part is done weekly.

11. HISTORY OF EDUCATION.

Senior.—Some account will be given of the education of the ancients. Greek and Roman educational practice and ideals will be studied. The schools of the middle ages will be noted, but the main emphasis will be placed on modern education and the work of the educational reformers, their methods and theories.

12. OBSERVATION.

Sophomore and Junior.—The pupils in these classes have the benefit of observation in all the classes of the training school and in the kindergarten also in the rural schools which are used as training schools. It is required of the Junior class two terms, and of the Sophomore class one term. It familiarizes them with conditions in all classes of schools—especially the country schools, which must be met by them as teachers.

Department of History and Economics

MR. BOSTIAN.

History is taught four years beginning with the Freshman Class. The history of the human race is an account of the stages of growth by which it has reached its present degree of culture and enlightenment. It is the aim of this school to present this fact to the pupil in a natural and logical manner—in its proper relations to causes and effects—and not as a mere series of disconnected events.

Pupils are expected to become familiar with the leading facts of history; to learn from these, lessons of patriotism and honor, which will make them better men and women and better citizens; to appreciate the causes leading to certain

developments; but, above all, to acquire that love for historical research which is so potent a factor in widening the mental and moral horizon.

In addition to the regular class-room exercises, topics are assigned to members of the class from time to time for collateral study, and these are discussed by the individual before the class. It is thought that by this means deeper interest in the subject can be aroused and the spirit of investigation cultivated. The pupil's imagination is aided as far as possible by means of engravings, illustrations, etc.

I. American History. After a brief review of the periods of Discovery and Exploration, the subjects of Territorial Claims, Settlement, Westward Expansion, and Later Development are more carefully studied, especial attention being directed to the underlying economic causes of the Revolution and Early American Institutions. Freshman Class, First and Second Terms.

II. Alabama History. The subjects emphasized in this course are: Exploration, Territorial Consolidation, Industrial Development, Reconstruction and Later Industries, Constitutional Development and the social and political significance of the phenomena of our dual form of government. Freshman Class, Third Term.

III. English History. Constitutional Development and the elements of the English Race are traced from earliest times. The economic eras and the Industrial Revolution are studied in the light of subsequent events. Emphasis is laid upon those epochs that function in American History.

IV. Ancient History. After a brief survey of the civilizations of the Nile and Euphrates and Tigris Valleys, a more detailed study of the histories of Greece and Rome. The distinctive contributions of these states to modern civilization are made a class plan for drill.

V. Modern History. Following course IV the line of study falls along Universal Christendom, Development of Nationalities and of Institutions, with an emphasis of time

upon the French Revolution, and the Building of Italy and Germany as the chief events of the Nineteenth Century.

VI. Political Science. Having reviewed the field of History in the preceding courses, a study is made of the Principles, Science, and types of Government. A fuller appreciation of American Institutions is aimed at through a comparative study of American and European types. European affairs are studied as a source of American Politics.

VII. Economics. An elementary text is used in this course, giving an outline statement of the subject of Economics and its Phraseology. Some attention is given the historic aspect.

Department of Arts

MISS HYDE
MISS MARKS

MR. YOUNG
MISS WEATHERLY

Realizing the demands of modern society for industrial education, the courses offered in this department are designed for the purpose of preparing prospective teachers for these subjects.

Students will receive special instruction on introducing these subjects into rural and other schools.

Manual training, domestic science, drawing, music, and the business course have each an educational as well as practical value, both of which are emphasized.

MANUAL TRAINING.

Freshman Class.—Elementary woodwork, care and use of tools, making useful articles for the farm such as germination boxes, axe handles, models for silos, single-trees, house and barn construction, model barn. Two periods per week. Text: Manual training for common schools. Salter and Cotton.

Sophomore Class.—The course for this year deals especially with farm mechanics, concrete work, the making of fence posts, horse troughs, laying walks, etc. Advanced woodwork and special emphasis on finishing

is required, a detailed study of paints, stains, varnishes and their manufacture. In this course emphasis is placed also on the construction of apparatus for the playground, for country schools, for physics and other departments of the school. Two periods per week.

Junior Class.—This course in this class is designed for giving methods in teaching manual training in the primary grades, and methods of introducing the subject into the country schools. Two periods per week for three terms.

Laboratory fee for all classes in manual training, fifty cents per term.

DRAWING

The following courses are offered in drawing:

1. Freshman. Freehand, representation of objects with pencil, charcoal, crayon or brush, fore-shortening and simple perspective, also work in colors. Two periods per week.

2. Sophomore. In mechanical drawing the use of instruments, lettering, geometric drawing, projection and development of surfaces, and simple plans for houses. Two periods per week for first half year. Same as 1, second half year.

These courses are closely correlated with the manual training. The student is familiarized with the state adopted books and methods, and he is taught how to introduce the subject into the schools and correlate it with the other departments.

3. Junior. Methods of teaching drawing in the grades and in the rural schools. Four periods per week first term.

HOUSEHOLD ECONOMY

This work is considered of such importance that every girl enrolled in the school is required to take it. The following courses are arranged:

Sewing.—1. Plain sewing, handwork, the making of the more familiar stitches, making of simple garments, darning.

2. Machine work and garment making, drafting of dress patterns by measurement, cutting, fitting and making of dresses.

3. Advanced work in sewing, including a study of fabrics and textiles.

Methods of teaching the subject and introducing it into the country schools will be given.

Cooking.—A complete outfit to accommodate twelve students at a time is now on hand, and this will be added to as found necessary. This is a most profitable course in the new science of home making. The following are offered:

1. Cooking from the recipe.

2. The study of food materials from a chemical and physiological standpoint.

3. Advanced cooking. The application of heat to food materials, methods of organizing and teaching the subject in the schools.

4. Household construction, sanitation and decoration. A study of houses and house planning.

Laboratory fees per term, for cooking \$1.50; for sewing 50 cents.

MUSIC.

The proper study of music develops a love for the beautiful, leads to an appreciation of the great works of art, awakens the emotional nature, provides a medium of expression, and exerts a cultivating and inspiring influence on character. The object of public school music is to inspire love of good music, to develop the emotional and aesthetic natures by the interpretation of good music and to teach the language of music for reading and singing.

The aim of the course is to give such work as can be put into daily practice in the school room. The course includes—

(1) Rote singing, songs of the home, occupation, seasons, nature, love of country, folk songs.

(2) Study of the rudiments of music and such elementary facts as an instructor should know in teaching in the public schools; sight reading, part singing and ear training.

(3) Method work is offered in the Junior year. A study of the professional aspect of the subject is made in this course. The proper conducting of classes; children's use of the voice; how to correct monotones; teaching of rote songs. The work of each grade through the eight grades is studied and outlined.

Chorus work including all the students of the school is given for a short period twice a week in part singing. This is a strong factor in familiarizing the students with standard compositions.

Quartettes and choruses are organized for the benefit of those who wish to do this line of work and to become more proficient in the art of reading and singing. Music thus prepared is used for special occasions.

Business Courses

MISS WEATHERLY.

PENMANSHIP, TYPEWRITING AND STENOGRAPHY

A course in Penmanship, Typewriting and Shorthand has

been added to the curriculum. It is felt that writing is becoming a lost art—that too little attention is paid to it—that the teaching of it is being neglected. Every teacher should be able to write a neat, legible hand, so as to teach his pupils to do the same. This is classed as one of the arts here, and all students have access to the writing class free of charge. The Palmer method of business writing is used. A course is offered in Shorthand and Typewriting to those who may desire to take it, at a charge of \$5.00 per month for both, or the complete course for \$35.00. The school is equipped with one Underwood Typewriter, and four Remingtons, and all necessary practice in this can be had. The systems of Shorthand taught are Munson and Gregg.

Physical Culture

MR. HARRIS

PRES. DAUGETTE

MISS FORNEY

The course in Physical Culture is modeled upon the Ling-Swedish System, which has for its chief aim the harmonious development of the body and mind as a unit. The exercises are of such character as can be used in the ordinary school room without any apparatus. The Normal classes are given instruction upon the theory of "The oneness of the human organism, the harmony between mind and body" as exemplified in the different practical exercises.

The aims of this course are as follows:

1. Corrective and Developmental.—Students often come to us who have round shoulders, ungraceful movements, and who are given to incorrect postures and attitudes in walking, sitting and standing. The exercises are often given with music, which tends to relieve stiffness, overcome self-consciousness, and give grace and ease. The relation of physical development to health and success in life is dwelt upon.

2. Psychical.—Mental development through physical expression.

3. Pedagogical.—The school has an out-door gymnasium with simple apparatus, which is of great benefit to all who avail themselves of its use. The exercises given are of such character as can be transferred to any

school in our State. A healthy spirit of athletics is encouraged. Educational games are taught. Several of these games, which are recognized as salutary, are engaged in to a reasonable extent, namely: Basket ball, volley ball, base ball, foot ball, and tennis.

The Director of Physical Training will prescribe the proper exercise for every pupil who desires it. He will teach base ball, basket ball, foot ball, and track teams, and every form of manly sport will be encouraged under legitimate supervision.

Work in Rural Schools

In order to meet the growing demand for teachers with special preparation for rural work this department has been established and will have the attention of several members of the Normal faculty. The course includes such subjects as the organization and management of the rural school, grading, daily program, physical environment, rural school methods and rural sociology. Opportunity is given the students to observe work of the rural schools near Jacksonville. Two of these schools are used as model and practice schools, one at Merrillton and one at Cedar Springs. The effort is made to use the county rural schools of Calhoun as training schools for the teachers of the State enrolled here. A lyceum course is maintained for them, school associations encouraged, industrial work stressed, county supervision had, better teachers, fewer schools, longer terms, and better roads advocated. The efforts put forth by the school in this work are discussed with the pupil teachers. The vital problems of the rural school which are met and dealt with furnish valuable lessons to them. A county commencement and a fair demonstrate the results obtained and furnish a strong incentive to get the work started in their home counties.
