BULLETIN OF

STATE TEACHERS COLLEGE
JACKSONVILLE, ALABAMA

A Cordial Invitation to
attend S. T. C. OF JACKSONVILLE

A copy of this booklet is sent to you for the purpose of aiding you in selecting the college you wish to attend and to make you acquainted with many of the activities which are engaged in here. Views of the grounds and buildings are shown.

This institution is in its fifty-seventh year and has been sending out men and women who have made a success in life. Many of them are principals of and teachers in high schools. Many of them are county and city superintendents and teachers in college; others have gone into law, medicine, politics, journalism, into business, into the army and the navy, into research, and some have gone into Congress. Many others are holding public office in the counties in which they reside, such as that of probate judge, tax assessor, tax collector, etc., and some circuit judges. Some have written their names high on the pages of history.

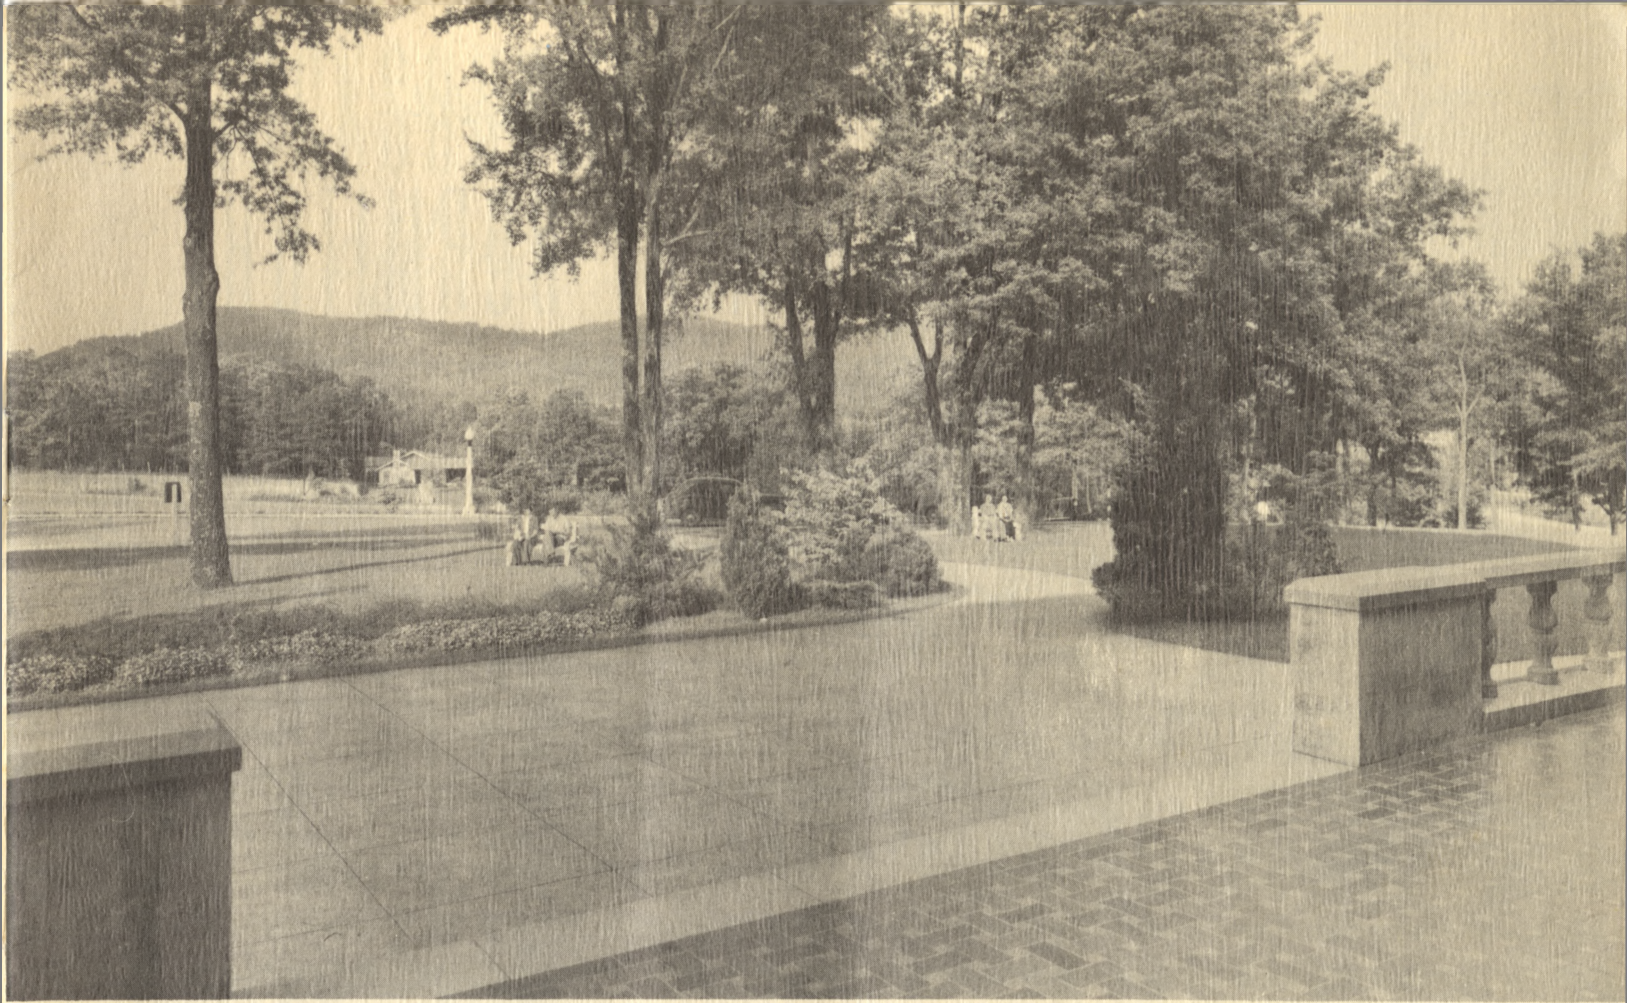

You are cordially invited to look over this booklet and if interested, to call for a catalog giving more complete information along every line. It will be a pleasure to hear from you.

Yours truly,

C. W. DAUGETTE,

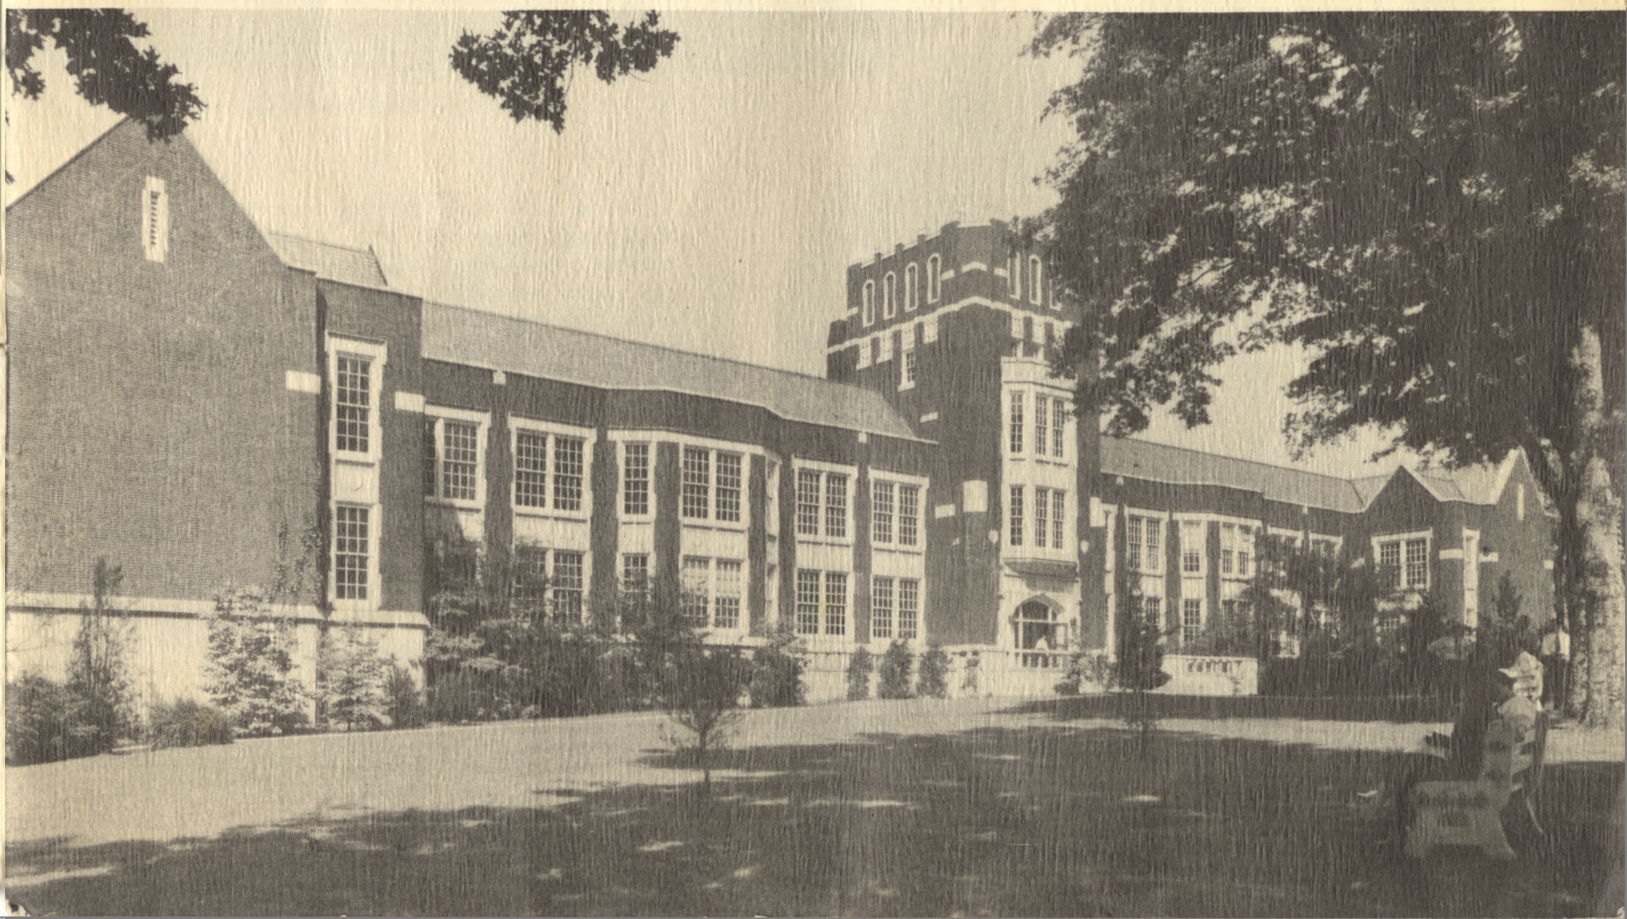

B.S., M.S., LL.D.

President.

The above is a scene taken at the front door of Bibb Graves Hall. The College has a lovely location, surrounded by mountains.

Below is Bibb Graves Hall, the main administration and classroom building. It has three full floors and is three hundred feet long.

Keeping House in the New

APARTMENT DORMITORY

THE APARTMENT DORMITORY

The students in the apartment dormitory have an opportunity to prepare their meals with the most modern conveniences. They have an electric stove, an electric refrigerator, and hot and cold running water for their sinks. The cost for girls for bedroom, dining room and kitchenette with lights, water, heat in winter and current for electric stove and refrigerator, in addition to supervision, is \$7.00 per month for each person. This is a modern fireproof dormitory completed in 1939. It has provision for tub and shower baths with hot and cold water. It has only two girls to the room. Each girl has her own bed. The dining room and kitchenette adjoins the bed room. The building is located but a short distance from the library and Bibb Graves Hall. Students who live in this dormitory bring foodstuff from home and have free guidance from the college dietitian in planning their meals.

JACKSONVILLE

offers

1. Preparation for teaching in the elementary schools
2. Preparation for teaching in the high schools, including the commercial branches
3. A general college education
4. Recreational opportunities for all students
5. Training in the social contacts of life
6. A B.S. degree awarded upon the completion of the required courses.

WEATHERLY HALL

HIGHER EDUCATION *at reasonable rates*

It seems extremely unfortunate that many of our brightest and most promising young people in the United States of America find the door of opportunity for a college education almost closed to them through lack of finances.

The State Teachers College at Jacksonville holds out to this class of people a ray of hope. Many different methods of living are to be found here:

1. Dormitory Life

- a. In two of the most modern fire-proof dormitories in Alabama, one for men and one for women, in which room and board may be secured for \$20.00 per month.
- b. In a student cooperative where the students get room and board in a dormitory which

will accommodate two hundred students at a rate of \$15.00 per month.

- c. In an apartment dormitory, described elsewhere, where an apartment may be had for light housekeeping.
2. Rooms in town for light housekeeping
 3. Cottages on the campus where rooms may be rented at an extremely reasonable rate for light housekeeping.
 4. A few places for men and married couples at Atkins Farm where rooms may be had free through the beneficence of Mrs. Fanny Atkins. All fees are extremely low for a standard institution accredited by the American Association of Teachers Colleges and the Southern Association of Colleges and Secondary Schools.

The State Teachers College at Jacksonville was established in 1883, the successor to Calhoun College. It is administered by the State Board of Education, consisting of:

Governor Frank M. Dixon
Superintendent A. H. Collins
Hon. W. D. Barton
Hon. N. D. Denson
Hon. Harry Ayers
Hon. Joe Starnes
Hon. L. W. Ellis
Mrs. W. A. Gresham
Hon. A. H. Carmichael
Hon. Donald Comer

When Calhoun College turned its property over to the State, it had a campus of twelve acres and one

brick building containing eight rooms, the total property being valued at \$16,000.00. It now has a campus of 126 acres, ten college buildings and twenty dwellings, all of which, with equipment, is valued at over one and one-half million dollars. This college is a member of the Alabama Association of Colleges and is fully accredited by the American Association of Teachers Colleges and by the Southern Association of Colleges and Secondary Schools.

It prepares teachers for the elementary and high schools. Thousands of its graduates are found in fields of education in this and other states, in the elementary schools, in the high schools, and in the colleges. One-sixth of all the high school principals of Alabama received all or a part of their training at Jacksonville; one-seventh of all the county superintendents of the state received a part of their training at Jacksonville.

a full

COURSE OF STUDY

The College offers four years of standard college work and when one receives the B.S. degree he receives a certificate to teach and graduates are usually placed in good positions by the time the degree is conferred. The college work is standard and is as good for those who wish to go into business and many of the professions as if the same work were taken in a liberal arts college. Some complete their academic college work here before going into other lines. Especially is this true if one manifests such characteristics as indicate to the guidance group that he will make more success in something other than teaching.

DORMITORIES

In endeavoring to provide proper living conditions for the men and women who are enrolled here the college has four dormitories: An apartment dormitory described elsewhere; Weatherly Hall, which will accommodate about two hundred girls and which is run as a student cooperative with room and meals costing \$15.00 per month; Daugette Hall, which will care for 168 girls. This is a modern fire-proof building in which each girl has her own bed and her own clothes closet, and at which board and room is furnished for \$20.00 per month. Forney Hall, dormitory for men, has a capacity of 152. The people here have the opportunity of taking meals at either Weatherly Hall dining room or the one at Daugette Hall. Proper supervision is provided for each dormitory.

CHRISTIAN ASSOCIATIONS

The Y. M. C. A. and Y. W. C. A. are in active operation. The work of these associations is heartily endorsed and encouraged by the College. Every effort is made here to provide for the moral and Christian development of the student.

The College has a faculty of sixty-eight men and women with Master's and Doctor's degrees from the best institutions of America and other countries.

TEACHER TRAINING

All the public schools of Jacksonville from Grade One through Grade Twelve, with an enrollment of about a thousand children, have been turned over to the State to administer as a laboratory school. The teachers in training have the decided advantage of doing practice in a real public school which includes a cross-section of the children of all classes in this country. They are not a selected group—some are transported from the rural districts; others come from the textile village; and others from the homes of business and professional people of the town, including the faculty of the college. There are twenty-four supervisors in the laboratory school, all holding the Master's degree. These people are well trained and this department of the college has always endeavored to keep abreast of the most progressive and accepted developments in education.

The New Curriculum Workshop Methods

This laboratory school has, for the last few years, been putting into practice the principles of the new curriculum as proposed in the development of the program for Alabama. Each classroom is a workshop. In addition to being equipped with the ordinary furnishings of school rooms, this school has a materials bureau including visual aids. This is under the direction of a trained specialist.

INTER-COLLEGIATE AND INTRA-MURAL *Athletics*

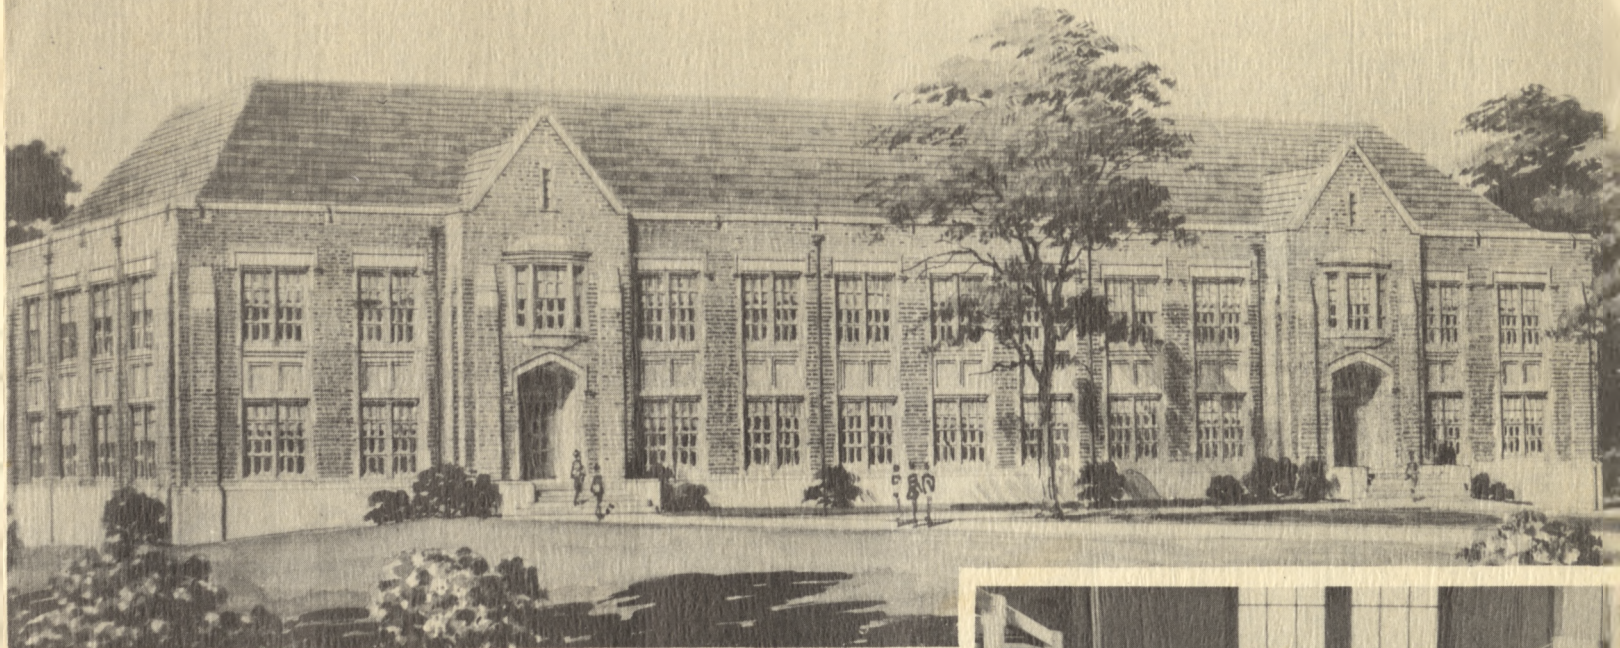

Jacksonville was the first school of college grade in the State to put in a course in physical education. For many years it was given and required without credit. Health and Physical Education has developed into one of the strong departments with four regular faculty members, two men and two women. All were trained in the leading institutions of this country for this particular work. All hold the Master's degree and some have done considerable additional work. The Department is housed in a lovely building which up to this time has cost over \$125,000.00 but it is still not finished. However, it has the largest gymnasium floor to be found in Alabama; four offices, two classrooms, lockers and showers with hot and cold water in both the men's and women's departments. An indoor pool in connection with the building is provided for but has not been completed though the college has an outdoor pool.

In addition, this department has a recreation house near, which is used for outings, parties and gatherings of small social groups. Intramural games of all kinds are taught and engaged in—all the games that can be used in public and high schools. There are eight tennis courts, eight volley ball courts, eight outdoor basket ball courts as well as two indoor courts, two baseball diamonds, two football fields, one speed ball field, two hand ball courts and a

number of shuffleboard courts. This college always takes part in inter-collegiate competitive sports of football, basketball, and baseball but no subsidy is ever given to players. Therefore, the colleges does not turn out people who can play football, basketball, and baseball but do nothing else. The men who play these games are primarily teachers. For this reason they are called into high schools as coaches. Calls have never been fully supplied. The dominant idea is to have every student participate in and if possible become proficient in some game. Planned recreation is provided for all students during their entire college life, the ideal being to keep them healthy and happy.

REFRESHMENTS BETWEEN CLASSES

It is realized that the graduates of this college must live with people in the world and that they are expected to be leaders; therefore, in order to fit into the different situations, they must have training in the social graces as well as in the usual subject matter of the college course. To develop this side of Jacksonville students great effort is put forth through the social contacts in county clubs, class and other organizations. They are furnished the means of becoming familiar with the amenities of good society through music—band, orchestra, and glee clubs, and entertainments provided for the students through properly supervised college dancing and group dancing, and through dramatics.
